DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 21- 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Banerjee et al. USPN 6,748,296.

"transmitting control commands to the vending machine to change operating parameters" (detailed description). "first operating function entails the use of the compartments for a vending machine" (figure 6). "a second

operating function entails the use of the compartments for logistic system for sending and picking up goods" (figure 3).

(Re claim 22) "transmitting the placement of the goods into the vending machines to the central data processing unit" (313 figure 3, 413 figure 4).

(Re claim 23) "filling of the compartments with goods by means of a graphic display unit" (claim 12).

(Re claim 24) "receiving goods in individual compartments for a certain period of time" (col 8 line 25-43).

(Re claim 25) "information about different user groups of the vending machine and information about the selection of individual offers a function of the appertaining user groups" (detailed description)
